

 Hint 1  Full Solution

C++

Java

Python3

#Back-end complete function Template for Python 3

```
from typing import List
```

```
class Solution:
```

```
    def makeBeautiful(self, arr: List[int]) -> List[int]:
```

```
        # code here
```

```
        def check(a, b):
```

```
            return (a < 0 and b >= 0) or (a >= 0 and b < 0)
```

```
        st = []
```

```
        for i in range(len(arr)):
```

```
            if len(st) > 0 and check(st[-1], arr[i]):
```

```
                st.pop()
```

```
            else:
```

```
                st.append(arr[i])
```

```
        return st
```
