QUESTIONS

QUESTION 5

5 marks

What does the following function do

Python Code

```
def function(x,y):  
  
    if y==0:  
  
        return 0  
  
    return(x+function(x,y-1))
```

- ☐

x+y
- ☒

x+ x*y
- ☐

x*y
- ☐

x^y

Your submitted response was incorrect.

Explanation

The function adds x to itself y times which is x*y
